AN INVESTMENT

Telephone directory advertising is an investment.

Like an account in the Savings Bank, your monthly payments draw interest—the interest of possible customers.

The constant repetition of your message, due to the continuous use of the telephone directory, will maintain an interest once it is created.

Carefully prepared copy will create this interest.

Can you afford not to try a medium which has proven of decided advantage to so many successful advertisers?

I Will Tell you Something:

My method for your ailments is as accurate as the science of figures; that is, when properly and scientifically applied. Trusting an amateur or novice to botch things up is a waste of time.

During my ten years of actual chiropractic work I have adjusted over 8000 different people, covering the multitude of ailments to which flesh is heir. Think this over. This should be convincing proof of my ability. During this time I have taken several post graduate courses. I carefully and scientifically examine all cases and adjust them personally. I employ no students or assistants.

The complete arrangement of my offices assures prompt attention. Its location is easy to find: 614 Fifteenth street, between Jefferson and Grove streets.

IF THERE IS anything wrong with your head, lungs, heart, stomach, liver, kidneys, or any other part of the body, you may be sure that it is a lack of life current going to those parts, due to a pressure on the nerves at the point where they exit from the spinal cord.

Dr. Jordan is a Graduate of several leading Colleges and is endorsed by the best Citizens of Oakland who are satisfied patients.

Dr. W. E. Stiles

CHIROPRACTOR

WHY?

BECAUSE—He is a Palmer School Graduate (and that is recognized to be the best, largest and oldest Chiropractic School in the world, three year course).

BECAUSE—Dr. Stiles uses only straight Chiropractic, no Osteopathy, electricity, surgery or massage.

BECAUSE—Dr. Stiles has proven to thousands of his patients that unless the cause of disease is removed one cannot expect to be well.

BECAUSE—Dr. Stiles in his work is sure of the cause of your trouble by taking a (picture) X-Ray of your spine. You yourself, can see where the nerves are pinched.

BECAUSE—Dr. Stiles has been located in the central part of Oakland (Syndicate Bldg.) for over six years.

BECAUSE—Dr. Stiles is licensed by the State Medical Board to practice Chiropractic in the State.

He will tell you honestly whether he can or can not make you well

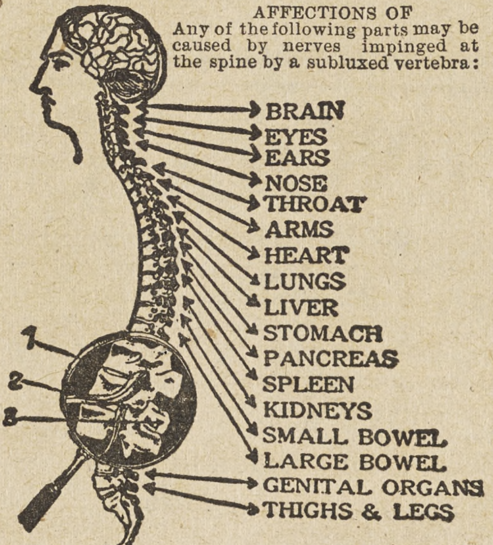
AFFECTIONS OF
Any of the following parts may be caused by nerves impinged at the spine by a subluxed vertebra:



SPINE OF MAN

By referring to the above illustration you will see near the lower end a **magnified** illustration of a normal and an impinged nerve. Fig. 1 shows a nerve in perfect health, performing its function as nature intended. Fig. 2 shows a nerve impinged, and the flow of vital energy obstructed. Fig. 3 shows vertebra out of alignment (subluxated).

EXPLANATORY

The brain is that wonderful organ which we intuitively recognize as the seat of all our power. We all understand that in some strange way, which has become so common to us as not to seem strange, that our sight, our hearing, our feeling and all of the other powers come from the brain. However, the question HOW this is accomplished rarely presents itself to us. Of course, we would all readily answer so far as the eye is concerned, by the optic nerve; but it presents a more difficult problem when we take the case, for instance, of a sensation in the stomach. In cases so remote from the brain, we immediately fall back upon the theory and to accusing the stomach of some wrong on its part, and do not assign the sensation in that locality to its true origin, because we have not been so educated. Yet we understand in an indefinite roundabout way, that every sensation in our entire body is an emanation from the brain. If this were not true, a wound would be painless.

When we begin to examine that wonderful extension of brain substance from the brain itself, called NERVE trunks, we find that they are composed of millions of small threads, called nerve filaments, and that they extend to every atom of the entire body and control every function of the body; that is to say, they control circulation, assimilation, seeing, hearing, smelling, tasting, feeling, heat and all the phenomena of the human organism.

It will be quite readily seen therefore that when these nerves are all in normal operation, every function of the entire body must be normal, and that any derangement of the nerves will equally derange the function which they, in normal condition, produce.

The brain covers itself by a number of bones which we call the skull, and the spinal cord is encased in a canal composed of twenty-four bones, named vertebrae. Between each pair of vertebrae is an opening through which a trunk nerve emanates. (See Cut.) When a vertebra of the spine, by any cause, is changed in its relation to another vertebra, the nerve that lies between will be pinched, and abnormal function, or "disease," is produced at the end of that nerve, or at the end of the filaments of that nerve.

A Chiropractor ADJUSTS the vertebrae into normal position, turns on the nerve supply and nature restores the body to a state of health.

Because you have no pain in your back is no sign the vertebrae of your spine are in perfect order. If a nerve leading to your liver is pinched, where it emits from the spine, the "disease" will be in the liver and not in the back. This is true of all the organs and tissues of the body.

I Want Difficult Cases

Eye-strain, headaches, dull, aching, itching, smarting, watering eyes, blurred vision, floating specks, apparently stupid children, incorrigible children, CROSS-EYES, insomnia, neurasthenia, irritability, depression, dizzy spells, impaired memory and other nervous derangements, THAT DO NOT YIELD TO OCULISTS' METHODS OF TREATMENT. If you have not been relieved of your symptoms, or your glasses do not give perfect satisfaction, call on me. I treat the eye as a part of the nervous system —not as mere organs of sight—and correct many nervous disturbances, by equalizing the distribution of nerve force. I USE NO DRUGS OR DROPS TO EXAMINE THE EYES.

Advertisers in the Classified Section of the Telephone Directory pay special attention to orders by telephone.

A FEW HINTS FOR ADVERTISERS

1. Make your advertising clear.
2. See that it contains something to interest those you desire to reach.
3. Your story should be brief and to the point.
4. Use clear type and sufficient space so that your message may be easily read.
5. Do not forget that blank space used to properly display your ad is sometimes of greater value than words.
6. If you use illustrations they should show something of interest in regard to the goods you are advertising.
7. In a large ad, especially in a newspaper, your firm name should appear both at the top and bottom of the ad.
8. Include your address in your ad. Do not take it for granted that every one knows where you are. Make it easy for strangers to find you.
9. Advertising is as vital to the expansion of your business as your salesmen and should be considered as part of your selling force.
10. When business is good it is poor policy to weaken your selling force by cutting down your advertising.
11. When business is quiet an advertising stimulant will often aid to revive it.
12. Spasmodic advertising will not produce satisfactory results.
13. Good advertising stimulates business.
14. Continuous good advertising wins.
15. Always remember that truth in advertising pays.

Customers

The business man should realize that he is separated from his customers — old and new — by minutes, not miles.

In these days of strenuous competition the successful merchant must make the best use of his resources, and there is none more important than his long distance telephone service.

In the transaction of business the use of the long distance telephone will mean the prompt answer, the personal touch and an economy of time.

Every Bell telephone is a Long Distance station.

The dealers in the various commodities you need and use are classified under more than fifteen hundred separate headings so that you may readily find the seller of anything you desire to purchase.

If you accustom yourself to its use you will find it an invaluable guide.
